May 14, 2010

Solutions for the Information Technology Enterprise Awards

(Washington D.C. - May 14, 2010) The Defense Intelligence Agency (DIA) has awarded 11 indefinite delivery, indefinite quantity (IDIQ) contracts supporting information technology (IT) requirements across the Defense Intelligence Enterprise and the greater Intelligence Community. The recipients of these contract awards are: (large) BAE Systems Information Technology, Inc.; General Dynamics Information Technology, Inc.; Lockheed Martin Corporation; Northrop Grumman Systems Corporation; Science Applications International Corporation; and Systems Research and Applications Corporation; (small) BC Fed Group LLC; CenTauri Solutions LLC; Enterprise Information Services, Inc.; Red Arch Solutions, Inc.; and Worldwide Information Network Systems, Inc.

The Solutions for the Information Technology Enterprise (SITE) contract is designed to enable streamlined execution, simplify purchase requests, standardize acquisition documentation, improve enterprise program management for customers, provide better reporting capability, improve contracting performance and data integrity and make the Agency's overall IT acquisition processes more efficient. Although managed by DIA, the contract will also incorporate IT requirements from customers across the Defense Intelligence Enterprise and the Intelligence Community. SITE is the second in a series of DIA Enterprise IDIQ vehicles intended to bring acquisition excellence to the Agency. It follows DIA's IDIQ contract vehicle entitled "Solutions for Intelligence Analysis" which was awarded in December 2007.

The SITE contract will have a ceiling of \$6.6 billion over five years. DIA is expecting SITE to facilitate cost efficiencies, innovative technical solutions, and enhanced competitive opportunities for industry. Competition among the listed firms for task orders under the SITE contract vehicle will begin this summer.

The SITE contract vehicle will replace the multiple awards for DIA's Department of Defense Intelligence Information System (DODIIS) Integration and Engineering Support Contracts

(DIESCON3) and replace the Air Force's longstanding Intelligence Information, Command and Control, Equipment and Enhancements (ICE2) single-award contract vehicle.

DIA is the nation's premier all-source military intelligence organization.

It provides the nation's most authoritative assessments of foreign military intentions and capabilities. The agency's four core competencies -- human intelligence, all-source analysis, counterintelligence and technical intelligence -- enable military operations while also informing policy-makers at the defense and national levels.

DIA's mission is unique and no other agency matches its military expertise across such a broad range of intelligence disciplines.
